Prof. Dr. Konrad Schindler

Head of Institute of Geodesy and Photogrammetry

ETH zürich

Konrad Schindler is a Professor and leads the Chair of photogrammetry and remote sensing in ETH Zürich. He received the Diplom-ingenieur (M.Tech.) degree from the Vienna University of Technology, Vienna, Austria, in 1999, and the Ph.D. degree from the Graz University of Technology, Graz, Austria, in 2003. He was a Photogrammetric Engineer in private industry and held research positions at the Graz University of Technology; Monash University, Melbourne, VIC, Australia; and ETH Zürich, Zürich, Switzerland. He was an Assistant Professor of image understanding with TU Darmstadt, Darmstadt, Germany, in 2009. Since 2010, he has been a tenured Professor of photogrammetry and remote sensing with ETH Zürich. His research interests include remote sensing, photogrammetry, computer vision, and machine learning

Abstract of the talk

My own career was not the outcome of a carefully considered and executed plan. I will briefly review the stages of my own professional development, and will try to carve out what lessons and principles can perhaps nevertheless be learned from it. I will leave plenty of time for discussion: every career path presents its own choices, constraints and uncertainties, I hope that the webinar will be more useful if participants bring up their own situations and questions.
